

BUCHER
municipal

Introducing the all
new **CityCat series.**

One revolutionary series.

Bucher Municipal is about to revolutionise the world of street cleaning with the all new series of 2m³ compact CityCat sweepers. With a choice of sizes, configurations and all-electric options, welcome to improved suction, enhanced connectivity, increased comfort and ever-important sustainability.

Increased modularity

The CityCat V20 series is built on the same 'platform'.

With everything under the hood – the cabin, chassis, steering and suspension – all being identical, there's a modularity that provides many benefits to customers.

Not only is it simple to switch between vehicles, but servicing, repairs and maintenance are also easier to complete. From training to logistics, these are sweepers where the advantages lie under the surface. Get set to gain from the modularity of what is essentially the same vehicle.

The CityCat V20

Bucher Municipal's flagship sweeper in the 2m³ class.

This 4.8t vehicle has a 2.1t payload and is the only articulated sweeper with a Euro 6d engine – a 62 kW VM four-cylinder common rail engine with exhaust gas turbocharger and intercooler.

As well as this, the CityCat V20 offers three brushes, high suction power, and with an energy-optimized fan for better efficiency. Combine low fuel consumption, low exhaust emissions and low noise disturbance, and you can see why it's time to start adding them to your fleet.

The CityCat V20e

Bucher Municipal's new all-electric sweeper.

Another 4.8t vehicle with the same 2.1t payload, the CityCat V20e is the second generation, electric powered sweeper with a difference. Here we utilise a custom-designed 63 kWh battery pack with the capacity to last a full 8 hour shift.

Powerful, yet respectful to its surroundings, the CityCat V20e can also be used round the clock - such is its impressive low noise emissions. This is proven technology with minimal harm to the environment.

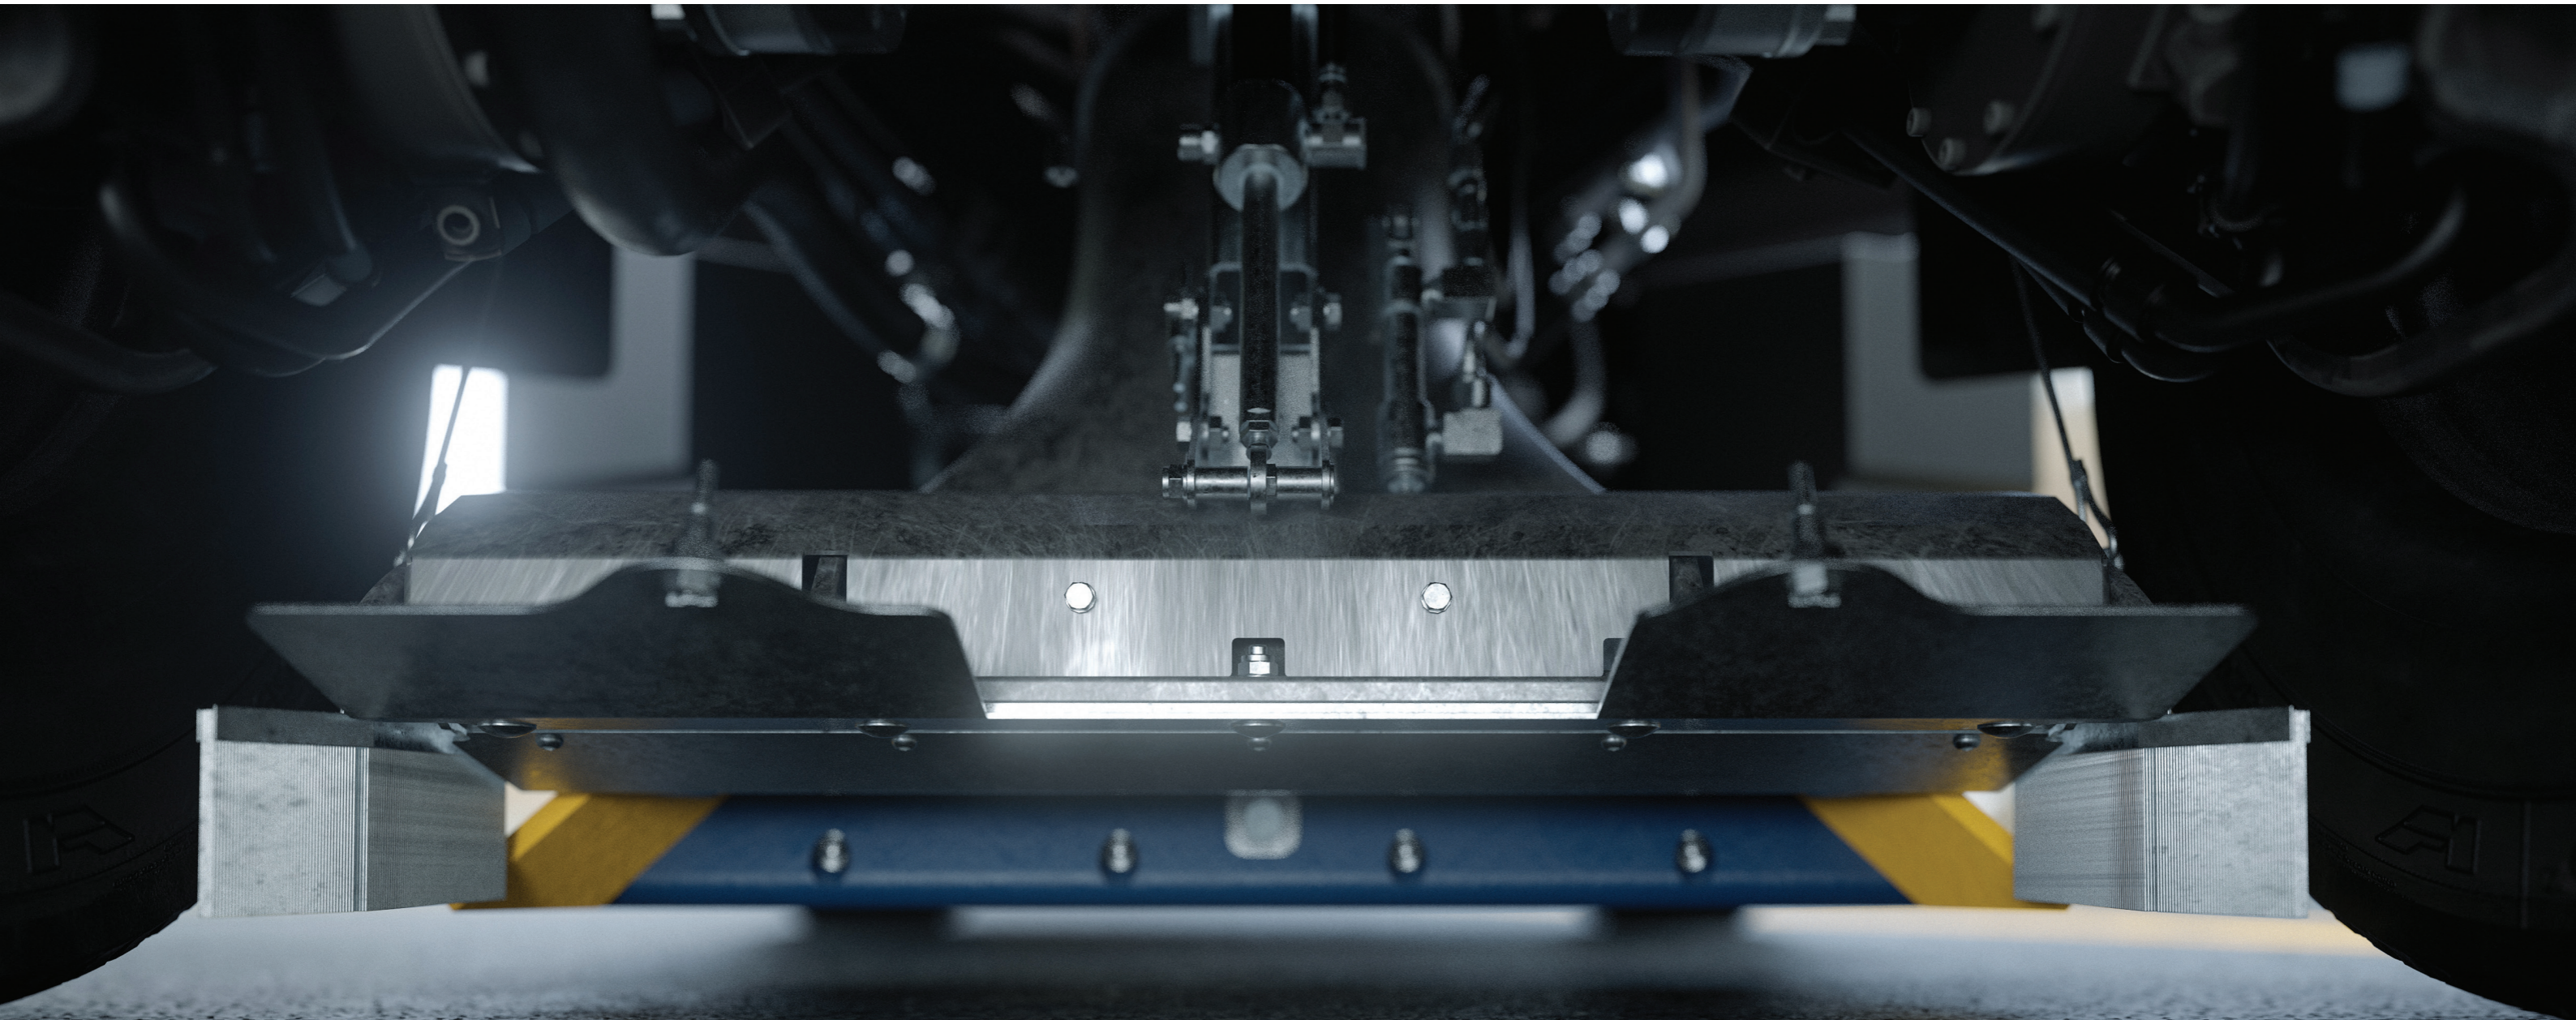

The CityCat VS20 & VS20e

Bucher Municipal's new lighter, more mobile sweepers.

Just 3.5t and with a 1t payload, these base models are our first in the new class. The CityCat VS20 & VS20e complies with weight restrictions for pavement usage and can be driven by anyone with just a car license.

The CityCat VS20 & VS20e are easy to use, simple to maintain and high in reliability. The possibilities of sweeping just became more agile.

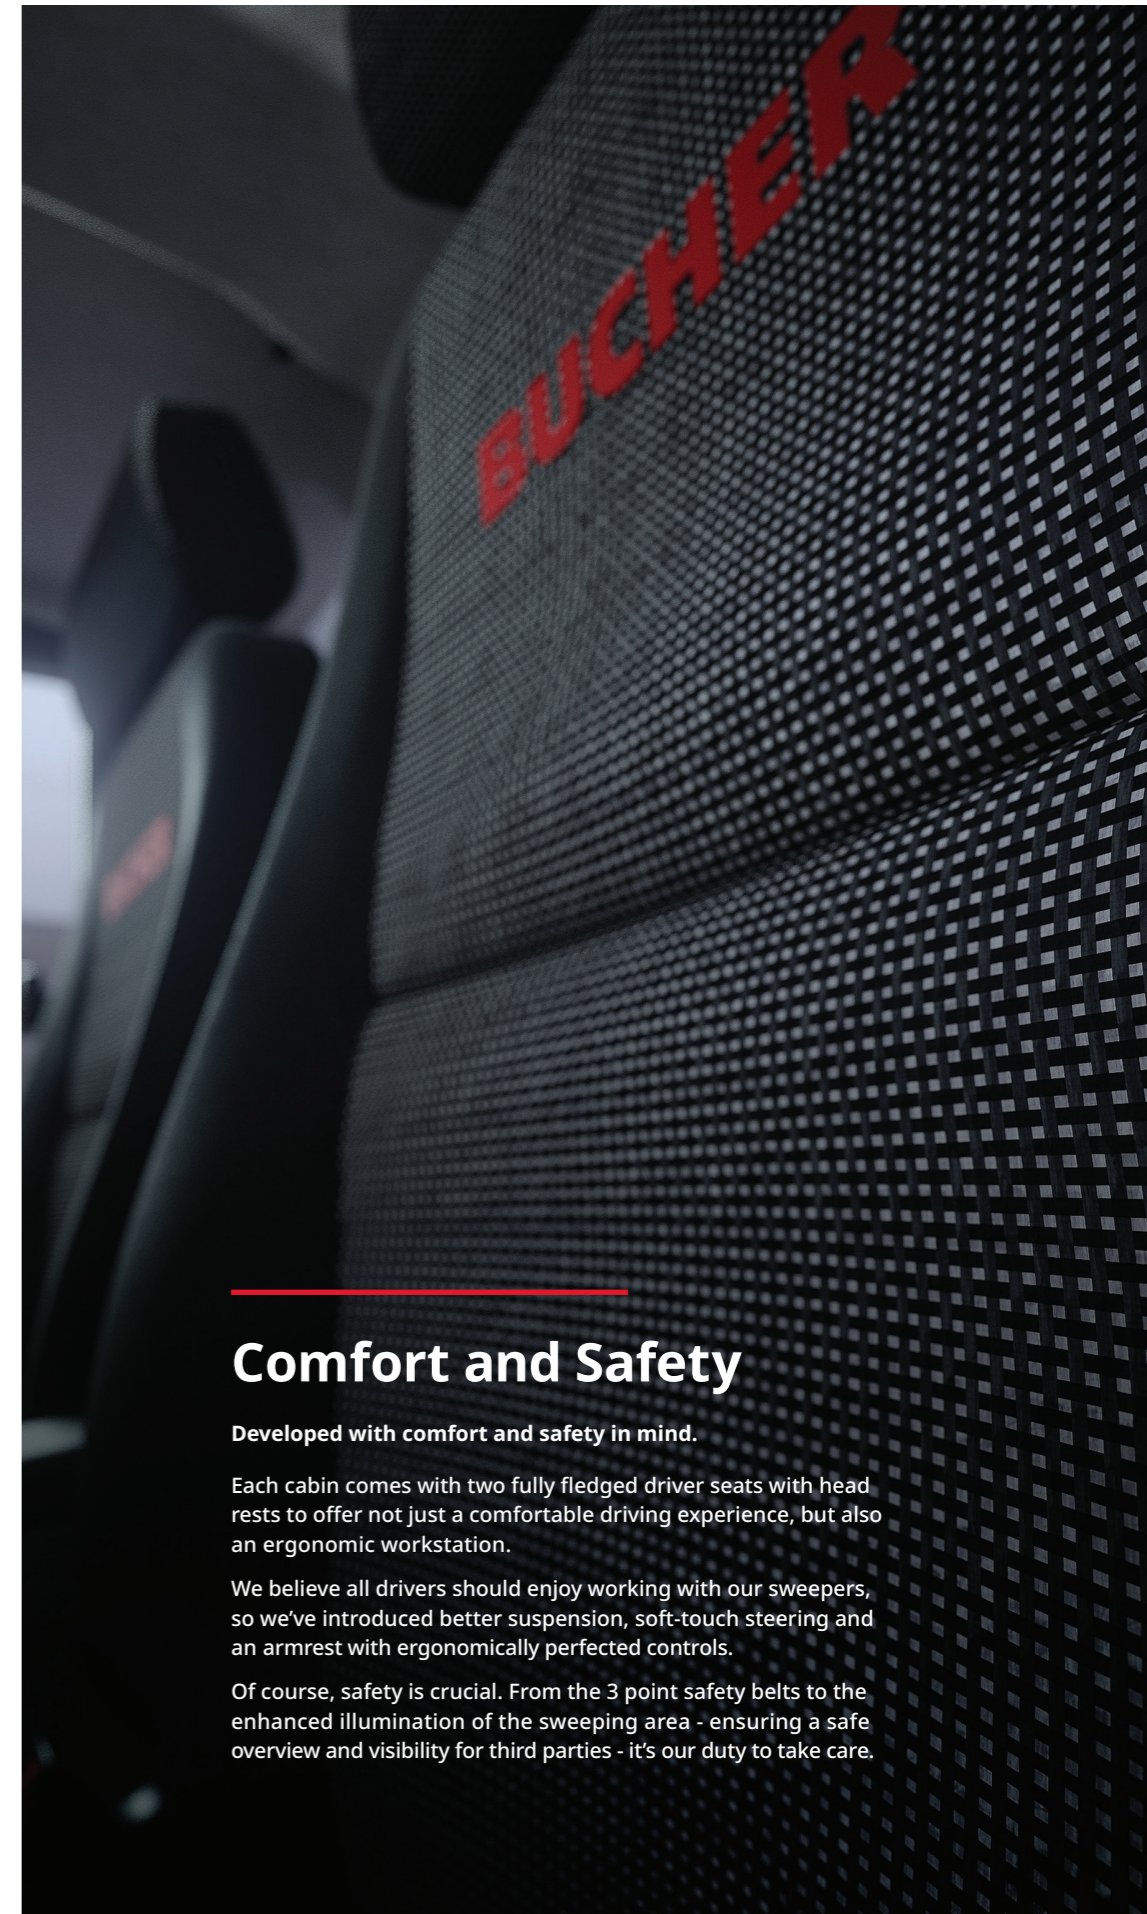

Unparalleled suction performance

All CityCat models are designed so the high-suction power hose is free to work harder.

Wide in diameter to pick up large items, and with a more efficient, energy-optimized fan that's no longer troubled by debris, the floating suction intake with patented mounting mechanism ensures maximum air velocity for perfect sweeping results, no matter how uneven the surface.

Just like the floating suction intake, the straight suction hose also belongs to the Bucher "DNA" and results in minimum risk of blockage and optimum air flow for trouble-free operation.

Comfort and Safety

Developed with comfort and safety in mind.

Each cabin comes with two fully fledged driver seats with head rests to offer not just a comfortable driving experience, but also an ergonomic workstation.

We believe all drivers should enjoy working with our sweepers, so we've introduced better suspension, soft-touch steering and an armrest with ergonomically perfected controls.

Of course, safety is crucial. From the 3 point safety belts to the enhanced illumination of the sweeping area - ensuring a safe overview and visibility for third parties - it's our duty to take care.

Sustainability

With our all-electric CityCat V20e & CityCat VS20e sweepers, sustainability remains a key focus.

Bucher Municipal has specially created a custom-designed Bucher battery pack that's tailored to the vehicle. This proven technology subjects minimal footprint to the environment and provides very low noise emissions.

And the good news is, even our diesel sweepers are ahead of the game when it comes to performing sustainably. The Euro 6D, Stage V engines meet all current environmental standards. There's maximum sweeping efficiency and a lower TCO.

Bucher Connect

All CityCat sweepers benefit from the innovative Bucher Connect platform.

Bucher Connect includes services designed to make fleet management much simpler. It has everything you need to carry out work at any location with ease.

All your needs are taken care of through our digital services, product services and technical assistance. Use Bucher Connect for your fleet and take advantage today.
